Safe, secure storage

Leading the Way to a Safer Future

The Anniston Chemical Agent Disposal Facility is safely destroying the stockpile of chemical weapons stored at Anniston Army Depot while ensuring maximum protection for the environment, general public, and personnel involved in the disposal effort.

- Disposal is safer than continued storage.
- Incineration is truly a safe, efficient disposal process.
- More than 18 million pounds of chemical warfare agents have been safely incinerated by the U.S.
- Pollution control systems protect people, environment.

Liquid Incinerator

Anniston Milestones/Facts
